Freelance Backend Developer

Remote

- Led the backend development and management of serverless microservices using AWS technologies (Lambda, API Gateway, S3, SNS, SQS, CloudFormation, DynamoDB, RDS, Cloudwatch, CloudFront).
- Wrote CloudFormation templates for all components of the project, handling everything from start to finish.
- Implemented authentication using Cognito and developed a feedback mechanism that converted audio data to text with AWS Transcribe.
- Developed various APIs and generated unique QR codes for each client.
- Built a customer-facing system for logging in and submitting feedback, which businesses could view on their dashboards.
- Scraped menu data from Zomato to create menus for businesses.
- Ensured all development aligned with UI design and project requirements.
- Handled backend coding, API testing using Postman, monitoring with CloudWatch, and version control using Git and GitHub.
