Summary

Backend Engineer with experience building serverless and multi-tenant backend systems using Node.js, TypeScript, PostgreSQL, DynamoDB, and AWS.

Education

B.Sc in Information Technology
Pillai College, Panvel

2018 – 2021

Experience

Software Engineer — Clover Infotech (Client: HDFC Bank)

Jan 2025 – Present

- Supported enterprise wealth management applications across incident management, deployment activities, API troubleshooting, and production/UAT operations.
- Coordinated infrastructure upgrades and maintenance involving Redis, Elasticsearch, NGINX, SSL certificates, and WAF/SSLO configurations.
- Worked with infrastructure and security teams on VAPT coordination, environment stability, and release management.
- Assisted in deployment validation, issue analysis, log investigation, and operational troubleshooting for enterprise systems.

Backend Engineer — Cloudberry Solutions

May 2024 – Jan 2025

- Built serverless backend systems using AWS Lambda, API Gateway, DynamoDB, PostgreSQL, Cognito, and CloudFormation.
- Developed REST APIs for loyalty systems, customer feedback workflows, QR-based review flows, and business operations platforms.
- Implemented authentication, asynchronous workflows, and PostgreSQL schema design.

Projects

APIStack.ai — API Management Platform

[Live](#)

- Built a multi-tenant API management platform using Node.js, TypeScript, PostgreSQL, and AWS serverless architecture.
- Developed backend services for RBAC, authentication, workspace management, subscription workflows, and API documentation processing.
- Designed shared backend libraries, PostgreSQL schemas, and CloudFormation-based infrastructure for scalable service development.
- Implemented OpenAPI/Postman ingestion workflows with S3 storage, ReDoc integration, and DynamoDB-based usage tracking.

Reality Flow — Real Estate CRM Platform

[Live](#)

- Built a multi-tenant real estate CRM platform using Node.js, Express, DynamoDB single-table design, AWS Lambda, API Gateway, Cognito, and S3.
- Designed authentication and tenant-isolation architecture with Cognito, Google OAuth, phone OTP flows, RBAC, and server-derived access control.
- Developed backend workflows for lead conversion, meeting scheduling, notifications, khata book management, document uploads, and property lifecycle operations.
- Built Playwright-based E2E testing infrastructure and CloudFormation deployment workflows for serverless environments.

Skills

Languages: TypeScript, JavaScript, Python, SQL

Backend: Node.js, Express.js, REST APIs, Authentication, Microservices

Cloud: AWS Lambda, API Gateway, DynamoDB, RDS, S3, Cognito, CloudFormation

Tools: PostgreSQL, Git, Linux, Postman, Selenium
